WHAT'S YOUR FAVORITE **COLR**

The COLR platform offers DITs, colorists, and broadcasters a powerful solution for wireless real-time color grading and remote camera control. We are extremely excited to announce 3 new models for NAB that will greatly expand COLR's connectivity and capabilities:

COLR LITE

Perfect for GoPros or DSLRs/Mirrorless cameras, COLR Lite offers real-time color grading with 3D LUTs and a CDL or 1D LUT.

- HDMI in / 3G-SDI out
- USB port for Camera Control and auxiliary power
- 802.11ac WiFi

COLR DUO

All the functionality of the original COLR with a second 3G-SDI output, allowing a unique 33-point 3D LUT and CDL or 1D LUT to be applied to each output.

- 3G-SDI in / 2x 3G-SDI out
- Gigabit Ethernet and USB ports for Camera Control and auxiliary power
- 802.11ac WiFi

COLR PRO

The world's first 4K real-time color grading system. Support for two simultaneous 12G-SDI inputs and up to four 12G-SDI outputs, with 2 independently applied 33-point 3D LUTs with a CDL or 1D LUT. Designed to be mounted in a rack or on a DIT cart.

- 2x 12G-SDI + HDMI in / 4x 12G-SDI + HDMI out
- Gigabit Ethernet for network connectivity
